DEPENDABLE STORAGE. SEAMLESS MOBILITY. TOTAL PEACE OF MIND.

Every clinical and lab professional wants quick access to organized, secure supplies. But most carts are heavy, hard to maneuver, and not built to last. That's frustrating; especially when time and cleanliness matter. The Element 06 Cart solves this with ACP construction that's 30% lighter than traditional carts yet incredibly strong, just like the material used to build the Epcot Dome. Combined with locking storage and medical grade Tente casters, it's a smarter, lighter, and longer-lasting solution.

LIGHTWEIGHT DURABILITY

- ACP construction is 30% lighter than standard carts and highly resistant to wear, impact, and weathering

SUPERIOR MOBILITY

- Tente casters—including a directional caster—offer smooth, controlled travel across floors and thresholds. Top has built-in handles

Soft-Close Drawers

- Full-Extension slides allow you to access the entire drawer

Built-in Handles with Incorporated Drip Channel

- Cleanable one piece top has integrated handle and grooved channel to prevent liquids from reaching the floor

Bulk Storage behind lockable clear hinged door

- Store larger items securely and visually with the lockable bulk storage compartment

5 Inch Tente Casters

- Two swivel, one total locking, and one directional locking caster
- Designed for the medical industry with thread guard and quiet initiative

TENTE DIRECTIONAL CASTER

- Enhances control during transport and prevents drifting in straight paths.

DURABLE

- Same advanced composite used in the Epcot Dome; built to resist impact, corrosion, and time

LOCKING DRAWERS & BULK STORAGE

- Single locking mechanism to keep items and supplies quickly accessible and secure

CLEANABLE CONSTRUCTION

- HDPE and ACP surfaces resist harsh cleaners and allow for repeated disinfection

Corrosion Resistant

Short Lead Times
